

Sodium- and reference electrode for the measurement of sodium in ultra pure water

Swansensor Sodium

Sodium electrode for trace analysis in ultra pure water, pH > 10.

Reference electrode with grounded glass sleeve

Calomel reference electrode with liquid electrolyte and easy to service grounded glass sleeve.

Technical data:

Swansensor Sodium

Measuring range with adequately conditioned sample: 0.01 ppb to 10 ppm Na

Operating temperature: up to 50 °C

Pressure: pressure-free

Material: ion sensitive glass membrane,
glass

Connection: screw plug

Swansensor Reference Na

Diaphragm: grounded glass sleeve
double junction

Reference system: HgCl (Calomel)

Electrolyte: KCl

Operating temperature: up to 50 °C

Pressure: pressure-free

Material: glass

Connection: screw plug

Swansensor Sodium

Swansensor Reference GS

Order number	Swansensor Sodium	A-87.720.010
	Swansensor Reference Na, including 100 ml filling solution	A-87.840.100

Consumables

A-87.892.400	Filling solution for reference electrode, 100 ml
A-87.729.010	Etching kit for sodium electrode
A-85.141.400	Sodium standard solution, 1000 ppm, 100 ml
A-83.910.010	Sensor mounting adapter Ø 12 mm / M20
