

New flowsensor: deltaT

Swansensor deltaT

AMI Turbiwell and AMI pH:mV
equipped with the optional
deltaT flowmeter

A calorimetric flow meter based on heat dissipation.
For potable water, surface water, effluents and other applications where other
flowmeters are clogged easily.

Main features:

- Flow-through tube with 10mm inner diameter
- Very durable, easy to clean and basically cannot be clogged up.
- Option for AMI Turbiwell and monitors with M-Flowcells (see datasheet).
- Ready to use and maintenance free

Ordering details:

A-87.933.010 SWANSENSOR DELTAT

Listprice: 315 €uro / 420 USD

The webshop features the Swansensor deltaT as option (section « more ») for
the available analysers.

Limitations:

- **Check datasheet for compatible analysers!**
- Retrofitting of existing analysers must be verified with our support staff
(support@swan.ch).
- Hard- and software requirements applies for the Swansensor deltaT as
described on the datasheet.
