

SWAN's AMI Transmitters support all common interfaces and communication protocols.

AMI monitors V2.5 provides the following optional interfaces:

Profibus / Modbus

The RS485 interface enables:

- Profibus DP
- Modbus RTU

3rd Signal Output

The 3rd signal output interface (analog current) provides 0/4 – 20 mA.

USB Interface

The USB interface is designated for firmware uploading as well as data logging with a USB storage device.

HART Communication

The HART 7 communication interface simultaneously provides digital and analog communication.
