

Flow cell Q-Flow UP-CON SL

Data sheet no. DenA8343315X

Flow cell for continuous conductivity measurement in ultrapure water.

Features

- For installation of one Swansensor UP-CON1000 SL with Swan's Slot Lock design for quick release of the sensor
- Integrated sample flow meter
- Flow cell made of stainless steel 1.4404 (SS316L)

Scope of delivery

- Flow cell Q-Flow UP-CON SL
- Mounting parts (M5 screws, washers, nuts and distance sleeves)
- Outlet tubing (LD-PE): 1.5 m
- Hex key (for Slot-Lock)

Sample conditions

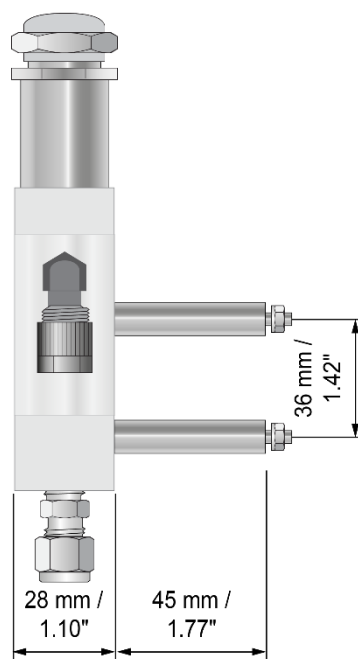

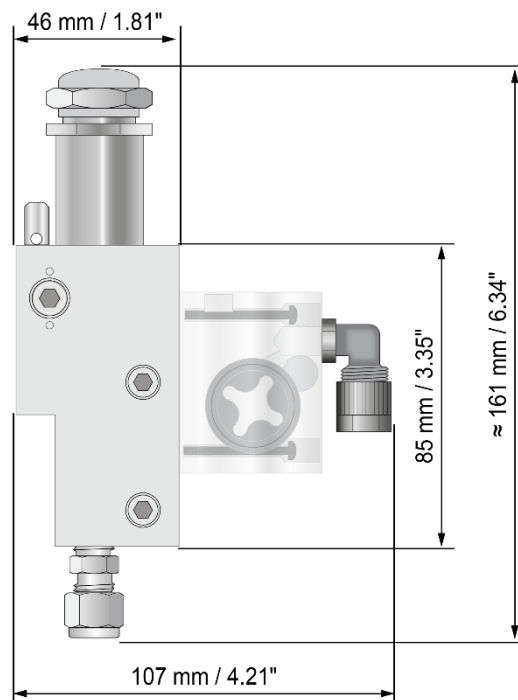

Sample temperature: 0 to 50 °C
Inlet pressure: max. 2 bar
(Install with a separate needle valve.)
Outlet pressure: ambient pressure
Sample flow: 3 to 20 L/h

Process connections

Inlet: Swagelok fitting with R 1/8" (ISO 7-1) thread for 1/4" tube OD
Outlet: 8 mm Serto tube adapter (PA)

Electrical connection

Flow sensor: cable with end sleeves
Use with SWAN Powercon transmitters.

Order numbers:	Flow cell Q-Flow UP-CON SL	A-83.433.15_
Flow sensor cable length:	1 m cable 5 m cable	1 5
